PROFESSIONAL EXPERIENCE

CIS Peer Tutor   01/2024 - Current
Bellevue University, Bellevue, NE

- Led over 75 tutoring sessions across 15+ different courses covering programming languages (Python, JavaScript, Java), software platforms, and frameworks (Bootstrap, NodeJS, Docker), resulting in a 40% increase in student success rates.
- Created individualized help assignments tailored to each student's abilities and instructor feedback, improving academic performance and enhancing learning outcomes.
- Guided 100+ students in assignment comprehension, test preparation, and lab environment configuration and setup, ensuring they had the necessary tools to successfully complete course requirements.

Web Developer / IT Support Specialist   10/2022 – 11/2023
Pierson Wireless, Omaha, NE

- Executed full-stack development tasks within an Agile team, applying methodologies such as daily standups, sprint planning, and retrospectives, ensuring timely project completion and proactively overcoming roadblocks.
- Implemented IT solutions by resolving support tickets, which resulted in a 20% reduction in downtime, while configuring workstations and decreased setup time by 15%.
- Monitored security systems, leading to a 25% improvement in response times and maintaining zero data loss, alongside crafting user guides to reduce help desk queries.
- Optimized onboarding processes, decreasing time spent by 20%, and contributed to innovative product features and improvements that bolstered team efficiency.

CDL Driver   10/2013 – 05/22
Forward Air Solutions, Omaha, NE

- Operated CDL Class A trucks for 8+ years with a 100% clean driving record, delivering over 6,000 loads safely and on time. Maintained 98% on-time delivery rate while adhering to DOT regulations and reducing maintenance costs.
- Ensured 100% accurate log management, contributing to a 99% compliance rating.

Professional Projects

Project 1: Web Form Application Project

- Developed responsive web applications using Bootstrap.
- Implemented dynamic form handling with JavaScript and jQuery.
- Leveraged AJAX for asynchronous server communication.
- Constructed a PHP backend for data processing and storage.
- Integrated MySQL database for efficient data management.
- Streamlined the job hazard analysis process, accelerating project approvals.

Project 2: Job Parts and Pricing Tool

- Created a web-based tool for integrating user-provided data with pricing catalogs.
- Designed to aid project managers in making informed decisions.
- Combined stored and new data for efficient analysis.
- Project 3: Support Ticket CRUD Application
- Engineered an IT Support Ticket Management System using Laravel.
- Enabled users to create, read, update, and delete support tickets.
- Enhanced the efficiency of the IT support team.
- Utilized MySQL for data storage and Azure and GitHub Actions for CI/CD and cloud deployment.

Project 3: Support Ticket CRUD Application

- Engineered an IT Support Ticket Management System using Laravel.
- Enabled users to create, read, update, and delete support tickets.
- Enhanced the efficiency of the IT support team.
- Utilized MySQL for data storage and Azure and GitHub Actions for CI/CD and cloud deployment.
